Finalize 24-25 Data

For the highest level of accuracy, it is strongly recommended to load TSDS CSV files to ODS. Until Ed-Fi promotion is stabilized and current for all submissions, this will ensure that the information in ODS is reflective of the information submitted to TEA for 24-25.

PEIMS Coordinator will be able to generate a CSV file in TSDS for all the PEIMS submissions (Fall, MidYear, Summer, Extended) and load directly to OnDataSuite. *Core Collections have recently become available from TEA to download.*

Filter (Potential Higher Ed Enrolled)

Potential Higher Ed Enrolled students counted toward the CCMR OB Career Ready estimate:

- **Maximum HE** reflect 100% of students that could potentially enroll in Higher Education and meets the TSI criteria as defined in the crosswalk. This is the default estimate in CCMR OB Met calculations.
- **Potential HE %** reports the filter percentage input of less than 100% students eligible in the Maximum HE count. Allows comparison of a potential high and low value and impact on CCMR OB Met counts.

This functionality is to provide a potential prediction of students that are not currently included in the **CCMR OB Career Ready** or have an **Associate Degree**, yet they meet the OB ELA and Math TSI requirement and may generate CCMR Outcome Bonus funding if the student enrolls in a post secondary institution – higher ed (HE).
